OUR PRODUCTS

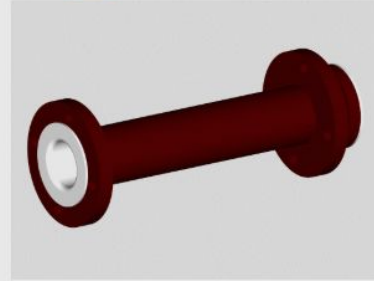

LINE PIPE

LINE FITTINGS

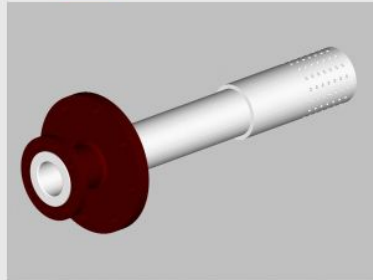

LINED VALVES

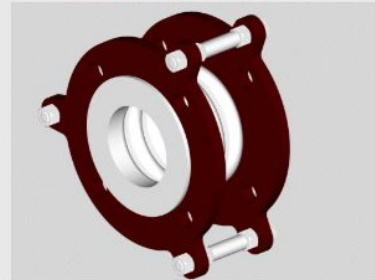

VIRGIN PTFE MOLDED ITEMS

SPECIAL DESIGNED PRODUCTS

EXPANSION JOINT

Applications of PTFE PIPE

Electrical Industries

In Electrical Industries, to cover electrical wires and cables a high quality Teflon PTFE tubing is used that can bear the high temperature and protect the wire from any cuts.

The background of the slide shows several stacks of white, cylindrical pipe fittings. Each stack consists of multiple individual fittings stacked on top of each other. The fittings have a flange-like base with two small holes. They are arranged in rows that recede into the background, creating a sense of depth. The lighting is bright, highlighting the smooth, slightly reflective surface of the material.

Textile Industries

The transfer of chemicals in the pipes used in the textile industries cause corrosion. So, to avoid this problem Teflon TPFE are used.

The background of the image shows several white, cylindrical pipes or tubes arranged in a fan-like pattern, extending from the top towards the bottom. At the base of these pipes are blue, circular flanges with multiple small holes around their perimeter. The entire scene is set against a light, neutral-toned background.

Chemical Industries

Non-alkali nature of the Teflon PTFE make it able to use in the chemical industries where transfer of the highly sensitive fluids is a common thing.

Medical Apparatus and Devices

Fluro Polymers are used in medical industries to manufactures various instruments and devices like drainage tubing, ventilators, earpieces and other artificial tissues.

CUSTOMER BENEFITS

Reliable piping solution

Resistance to all corrosive chemicals

Manufacturing facilities near customer's plant

Best process for each piece

It's fully integrated Brand in Fluoro Polymer sector

We pride ourselves in offering International Quality Standards which is strictly follows ASTM F 1545 with Test and Guarantee certificates. To ensure that our products and processes continue to remain at a consistently high level in future, we work in compliance with ISO 9001:2008. We provide Specimen of PTFE, PFA and FEP dimension 50mmx50mm for Research & Development to the customer on request.
